

REMARKS

Applicant respectfully submits that Species 1 (Figure 2), Species II (Figures 3A and 3B) and Species III (Figures 4A-4F) all illustrate common features or elements. A review of the Figures clearly shows that they include the elements of "Enable feature", "Capture image", "Display image" (except Figure 2), and "Identify or Select Class of Data in Image". The remaining elements in each of the Figures provide different examples with respect to element 208 in Figure 2, "Perform Predetermined Function or Functions in Response to Class of Data". Accordingly, Applicant respectfully submits that any search for the elements of Figures 4A-4F would also encompass the elements of Figure 2 and Figures 3A and 3B of Species 1 and Species II respectively. For this reason, reconsideration and withdrawal of the election/restriction requirement as to Species I, II and III is respectfully requested.

Applicant respectfully submits that the following listing of claims is readable on elected Species III: 1-25, 32-42, and 48-54.

Respectfully submitted,

Date: February 2, 2007
